# VITRO<sup>®</sup> Metal Door Frames

We are dynamic manufacturer of metal door frames providing quality products which is economical and reliable.

## Feature Overview :

- Fast & simple installation
- Light weight & easy transportation
- Environment friendly, 100% recyclable
- Generally do not require lintel & heel stone
- Provide a smooth, clean & neat finish to brickwork
- No additional surface preparation & readily paintable
- Forming an integral part of the wall & enhance its structure strenght
- Aesthetical with built in architraves & convenient with built in hinges
- Higher cost effectiveness or more economical than timber frames
- Will not warp, shrink, Distort, rot or be damaged by pest attacks
- Striker plate & lock pocket and shock absorbing buffers

### Material :

Electro Galvanised (EG)  
Hot Dipped Galvanised (GI)  
Galvaneal (GA)  
Zincalume (ZcL)

### Tolerance :

Thickness for material :  $\pm 0.05\text{mm}$   
Overall Profile Cross : Section Width  $\pm 3\text{mm}$

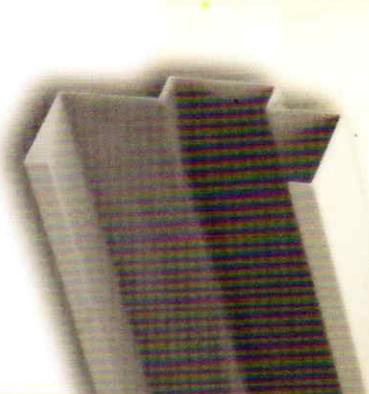

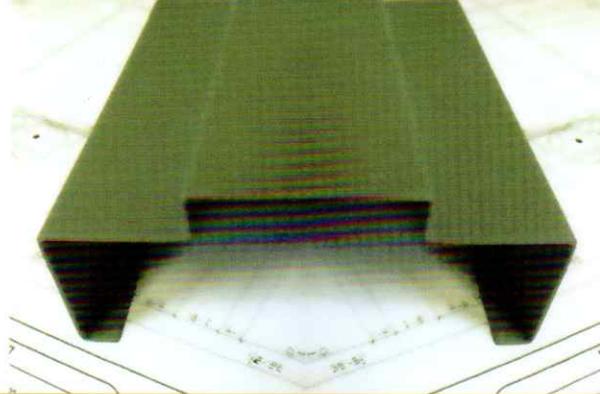

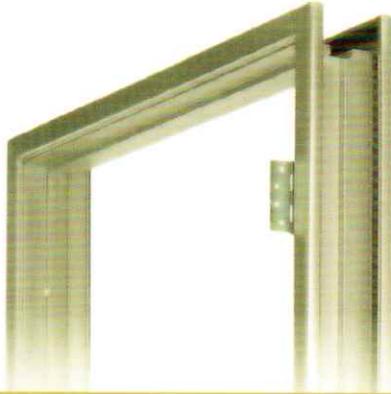

### Hinges :

Plated, 100mm loose pin slotted and welded into verticals, 3 pcs per frame.

Striker Plate

Fish Tail : 6pcs per frame

Mild Steel Security Bars

## Metal Door Frame & Accessories

### Precision Cut Corner Junctions

Each corner of the frame has been precision-cut 45° using the best tooling available, which enabling a snug fit resulting in a magnificent one-piece finish.

### Striker Plate

A unique screwed-in striker plate with a gentle curved lead-in edge is provided with every door frame which provides better aestraction resulting in quieter and smoother operations at the same moment compliment the clean profiles of the door frames. The tongue of the atriker plate is adjustable to provide accommodation for all types of doors.

### Unobstructive Hinges

Mullions are slotted to conceal the neat, slimline and coated hinge back plate on all Metal Door Frame. These hinges are made to fit quickly and easily without detracting from its overall design. Screw on Hinge, Nylon Ringed Hinge, or Stainless Steel Hinge are optional.

### Back Opening

Supplied in variety of sizes depending n the profile of the frame. 95mm for modular Brickworks and 110mm to suit standard sized bricks. Can be custom made to any opening sizes for Press Formed Frames.

### Adaptor Bar

Metal Door Frames are supplied with Adaptor Bar which will be nailed at the Bricks to strengthen the structure of the frame.

### Temporary Speader Bar

Metal Door Frames are supplied with temporary speader bars (bottom rails) to strengthen the structure of the frames & ensuring a perfect square during handling, transportation and installation. They are designed to de easily removed.
